PROFESSIONAL EXPERIENCE

Fullstack Developer @ Atos Information Technology GmbH

Providing solutions for the German public sector

05/2023 – present
Fuerth, Germany

- Convert legacy system built on JSP and Struts Framework to modern web application.
- Designing, generating and implementing RESTful APIs to interact independently with client application
- Develop seamless transition of production code into new React components

Software Developer @ Atos Information Technology GmbH

German public sector

08/2022 – 04/2023
Fuerth, Germany

- Developed an automated management tool for the sales team, resulting in a 14% increase in response time and a more efficient workflow.
- Improved user experience by maintaining and adding new features to the Client Application using Angular 14.
- Implemented a RESTful API using Java 17 and Spring Boot 2 to manage and manipulate email data, resulting in a streamlined and automated process.
- Incorporated automated and manual testing to improve accessibility by 20%, ensuring a more user-friendly experience for all users.
- Collaborated with the team according to Agile Project Management (Scrum) methodologies, leading to a more productive and efficient development process.

Financial Consultant @ MLP Finanzberatung SE

Providing financial service, banking and insurance B2C

06/2020 – 12/2021
Erlangen, Germany

- Designed comprehensive financial plans for clients
- Assessed clients' risk tolerance and investment goals
- Reviewed clients' insurance coverage and made recommendations for changes

Account Manager @ Hemmersbach GmbH 
IT service from procurement to on-site support

11/2019 – 05/2020
Nuremberg, Germany

- Reviewed complex proposals and financial reports
- Analyzed data to identify trends and recommend solutions
- Presented findings to senior management and customers
- Collaborated effectively across departments

Sales Manager @ Spielwarenmesse eG 

11/2018 – 06/2019
Nuremberg, Germany

Largest international commercial toy fair connecting exhibitors with buyers

- Defined and implemented strategies to increase market share and revenue
- Demonstrated expertise in managing key accounts and developing new business
- Negotiated and closed deals with major international and national accounts

PROJECTS

Automation Tool for client requests

10/2022 – 04/2023

Problem: The process to win deals in an IT consulting business relies on offer requests and bids. In order to funnel those emails and make the bidding process more transparent, we developed an app in an agile environment.

- **Backend:** Java, Spring Boot, Maven, MongoDB
- **DevOps:** Jenkins, Docker
- **Frontend:** Angular

Multiple Web Applications

01/2022 – 08/2022

Angular | React

- Dynamic Angular app to filter and retrieve movie data from RESTful API interfaces built with Node/Express.js connected to MongoDB. The user can create a profile, stream movies, and perform CRUD operations to save movies and modify user data.
- Development of an event app built with React.js using the Test Driven Development approach which lists, sorts and visually displays events retrieved from Google Calendar API.
- Landing page to showcase a creative portfolio

Responsibilities:

- Designed and implemented an appealing frontend design that enhanced the user experience and usability of the application.
- Conducted rigorous unit and integration tests using Jest and Cucumber, verifying the functionality and reliability of features and improving overall code quality.
- Successfully developed and integrated a robust backend REST API, enabling seamless HTTP communication between the frontend and backend components of the application.

EDUCATION

Fullstack Webdevelopment

03/2022 – 08/2022
Berlin, Germany

Career Foundry

Obtained hands-on skills of modern Web Development by building six projects with React.js, Angular, Node.js and non-relational Database.

Master of Theology

09/2011 – 06/2018
Tuebingen, Germany

Eberhard Karls Universität

CERTIFICATES

Software Architect (iSAQB)

Foundation

Fullstack Web Development

(CareerFoundry)
